

## National Climate Change Monitoring and Evaluation (M&E) framework workshop

12-13 December 2013,

Golden Sea Hotel, Sihanouk Ville, Cambodia

Using the support provided by Cambodia Climate Change Alliance (CCCA), the Climate Change Department of the Ministry of Environment Cambodia, is jointly organizing a workshop with the International Institute for Environment and Development (IIED) aimed at developing a 'National Climate Change Monitoring and Evaluation (M&E) Framework'. This is building on the recently launched Cambodia Climate Change Strategic Plan (CCCSP), which sets the overall national policy for climate change and recommends the establishment of a National Framework for Monitoring and Evaluation of climate change response. Key line ministries have also developed their sectoral Climate Change Strategic Plans under the overall framework of the CCCSP.

The International Institute for Environment and Development is supporting Cambodia in this process as part of an evaluative framework namely "Tracking Adaptation and Measuring Development (TAMD)" which is being tested in other countries, including Nepal, Pakistan and Mozambique.

The objectives of the workshop are:

- Improving and enhancing better understanding by policy makers of line ministries on the M&E processes
- Involving the main climate change projects and programmes (e.g. PPCR, NAPA follow-up etc.) in process
- Seeking a common understanding on the outline of the national framework – with particular focus on the adaptation and resilience aspects – and establishing a roadmap for development and implementation
- Sharing relevant experiences from other countries and international best practices
- Identifying the links between M&E of climate change and the CC mainstreaming process in development planning at national and subnational levels.

The workshop is targeting participants drawn from:

- Climate change focal points and managers of the planning department of line ministries
- Climate Change Technical Team members of line ministries
- Ministry of Planning, Ministry of Economy and Finance, the National Institute of Statistics, the Council for Development of Cambodia
- Representatives of Development Partners and major adaptation and mitigation projects
- Universities, research organizations and NGOs engaged in climate change
- CCCA Trust Fund Grantees
